

VB-Airsuspension

Air-suspension is becoming an increasingly important option for Light and Medium Commercial Vehicles. Whether this is for improved comfort, increased stability, or enabling a vehicle to lower or raise for easy access, there is a solution for every application.

VB-Airsuspension, in Varsseveld, provides this solution by manufacturing air-suspensions for virtually every make and model of Light and Medium Commercial Vehicle.

As European market leader, VB-Airsuspension designs, test, validate, manufacturers and sells a range of air-suspensions which are as broad as possible. From semi air-suspension to full air-suspension; for customers with adaptations such as ambulances, busses, car-transporters, campers and other application.

VB-Airsuspension export to over 50 countries worldwide with the focus on EU-27

Now you understand why more and more manufacturers of light and medium commercial vehicles adopt the VB-Airsuspension products and systems as their own.

VB-Airsuspension is always on the move; our goal is to be ahead of market developments, we want to trend setter and best in class, by continuously improving our product and continuing to innovate as much as possible.

Products and services offered by VB-Airsuspension:

- VB-FullAir; is a full-automatically (adjustable) solution for the suspension problems. The existing leaf- or coil-spring will be disassembled for the fitting of a FullAir air-suspension system. This contains following parts; air-springs, shock absorbers, compressor, an electronic control unit and a remote control. Top level improvement on comfort, handling, stability and safety is achieved with this suspension modification
- VB-SemiAir; is a manually operated (adjustable) solution for the suspension problem. The existing leaf- or coil-spring will be added with a SemiAir air-suspension system. This contains following parts; air-springs, compressor and a control panel. Medium level improvement on comfort, handling, stability and safety is achieved with this suspension modification

VB-Airsuspension also supplies:

- VB-SpecialParts are shock absorbers, anti-roll bars, leaf-springs and other suspension related parts.

Unique Selling Points of VB-Airsuspension are:

- we have our own development, engineering, prototyping, testing, validation production and workshop.
- we have our own electronic suspension controls in hard and software.
- we have mechanical, electronical, pneumatical, hydraulical, kinematical, NVH and vehicle dynamics know-how, all needed to be a one stop shop partner in suspension engineering.
- we test our newly developed products (naturally) with great regularity, in conjunction with several independent parties. For this purpose we have detailed and state-of-the-art electronics, testing equipment and we regularly visit special test tracks to verify and validate continuously
- we work according to the ISO 9001-2008 standards and are RDW, CNRV, VCA and TÜV certified.
- we are 'Quality Approval Partner' for various vehicle manufacturers and we are Tier1, 2 and 3.
- we are officially a vehicle manufacturer and apply to 70/156/EEC regulation and we can also work according to 2007/46/EEC.
- we are a system supplier and not a parts supplier.

Contacts looked for:

VB-Airsuspension is a fast expanding company looking for partners worldwide. The goal of participating at the Auto Expo 2012 in New Delhi is to find a local Indian partner interested to work with VB-Airsuspension to develop air suspension systems according to VB-Airsuspension methods and principals. Parts should be localized by the partner. Our future partner has to be willing to invest in a long term relationship based on win – win principal.
